

JBJS Ace

A New Resident-Focused Exam Preparation Resource

JBJS Ace is our new test preparation app designed exclusively for orthopaedic residents. It combines improved content, remediation, and resources with podcasts, peer rankings, and a powerful AI chatbot. The chatbot is trained exclusively on the JBJS publication library and Chapman's textbook, allowing residents to ask questions on virtually any orthopaedic topic and receive tailored, reliable answers.

For orthopaedic residency programs already subscribing to JBJS Clinical Classroom, JBJS Ace adds a complementary, resident-focused exam preparation experience designed to help residents prepare more efficiently for the OITE and Boards.

Residents can download now for 50 free OITE-style questions

More info on JBJS Ace website: <https://ace.jbjs.org>

What does this mean for you?

Upon request, JBJS Ace will be provided free of charge to residency programs that already subscribe to JBJS Clinical Classroom. There is no change to your JBJS Clinical Classroom access—your program simply gains an additional JBJS resource for residents, with access codes available by request.

How is JBJS Ace different from JBJS Clinical Classroom?

JBJS Ace offers upgraded content and questions built specifically for residents preparing for exams, while JBJS Clinical Classroom remains a broader learning platform used by both residents and practicing surgeons. The adjacent charts highlight the key differences.

Interested in Resident Access?

Residency programs may request resident access codes by contacting Aidan Smith at asmith@jbjs.org.
